ELECT A PRESIDENT

The University of Virginia has been without a president since the death of Edwin A. Alderson. The passing of this sterling educator was a great blow to Virginia's pride institution, but the necessity of functioning without a new president since that hour has been an unfortunate choice on the part of the board of visitors.

The board meets this month, and not only alumni of Virginia but all the state should join in urging them to act that the place of president of the University be filled at once.

WHAT MAKES A CHAMPION

W. L. (Young) Stribling, who died in Macon this week as a result of a motorcycle accident, never received a championship although he engaged in some 300 prizer fights. He was one of the Souths three greatest contributions to sports, the other two being Ty Cobb and Bobby Jones.

Stribling met them all. His career was marked by both sensational and mediocre performances. He was down in the ring's history as a fighting enigma. He beat the best in the game but somehow never wore a champion's crown.

But, what makes a champion? In our calculation "Bill" Stribling was more of a champion than many who have worn the prize crowns, for he gave his sterling best and never shrinked from a match.

NOW WE KNOW

This mornings papers reveal that one brokerage house sold stocks for $53 per share to a total of 2,900 shares that way! That shows just what suckers the investing public turned out to be and how foolish for the suckers who lost in 1929 to try again.

The Letter Box

Editor, Times-Virginian,
Appomattox, Va.
Dear Sir:

Appomattox County has refused to yield to outside pressure and join "The Wet Parade." The vote shows very clearly that our people have a mind of their own and do not want liquor in any form. The large vote for Prohibition is a credit to the county, to its moral leadership and to its enforcement officers and, a mandate to the proper authorities to refuse pemits for the sale of intoxicants of any degree and in any manner whatever. Furthermore, it is a clear rebuke to the bootlegger and to those who patronize him.

The results here show what might have been done in any county in the state with the proper leadership and, it is gratifying to know that our Sunday School Superintendents and other church officials, with a few glaring exceptions, have "feared God rather than men" and have been true to their conscience rather than to the dictation of the wet element in both political parties.

The vote in the state was not a surprise to the writer for our people have been victims of hysteria but he feels sure that they will soon regret their action.

The vote in Appomattox county was a vote in favor of the National Recovery Act.

Yours truly,
Dry Reader.

Why Hospitals Use a Liquid Laxative

Hospitals and doctors have always used liquid laxatives. And the public is fast returning to laxatives in liquid form. Do you know the reasons?

The dose of a liquid laxative can be measured. The action can be controlled. It forms no habit; you need not take a "double dose" a day or two later. *Nor will a mild liquid laxative irritate the kidneys.*

The right liquid laxative brings a perfect movement, and there is no discomfort at the time, or after.

The wrong cathartic may keep you constipated as long as you keep on using it! And the habitual use of irritating salts, or of powerful drugs in the highly concentrated form of pills and tablets may prove injurious.

A week with a properly prepared liquid laxative like Dr. Caldwell's Syrup Pepsin will tell you a big, fine, wholesome story. Syrup Pepsin can be "as regular as clockwork." Dr. Caldwell's Syrup Pepsin is an approved liquid laxative which all druggists keep ready for use. It makes an ideal family laxative—effective for all ages, and may be given the youngest child. UNUSUAL ANIMAL ACT ON PROGRAM AT STATE FAIR; ADMISSION PRICES REDUCED

The unusual spectacle of a performing zebra will be seen at the annual Virginia State Fair in Richmond the week of October 2 to 7. The zebra is considered the smartest, most "cussed" of wild animals and one of the most difficult to train, for he will battle until he falls from sheer exhaustion. Yet the celebrated trainer, Max Gruber, has not only subjugated one of these beasts, but puts him through a routine of remarkable tricks in his highly entertaining act styled "Jungle Oddities." Performing with the beautiful, striped creature, and on the best of terms, are a remarkably trained elephant and a handsome Great Dane pictured above at the left.

Another headline act at the fair's entertainment program this year is shown above, on the right, known as Hamid's Arabian Whirlwinds, declared to be the greatest acrobatic attraction ever brought to Richmond.

The pretty miss at the right is one of the group of graceful and shapely diving nymphs who take part in Ritchie's Water Show, another feature to be seen each afternoon and evening before the fair's grandstand. A small water tank forms the playground for these aquatic marvels, who combine thrilling dare-devilry with beautiful diving.

The Cyclonic Trio, who stage a remarkable performance on roller skates, and take a spectator from the audience for a thrilling and laugh-provoking "ride," and the Flying Lumbians, known throughout the circus world as the most daring and skillful performers on the flying trapeze, are other outstanding numbers on the fair's elaborate program.

Cervone, noted as one of America's great conductors, will bring his big dance band to provide the music for the fair's grandstand show, while Victor Zacchini, "the human bullet," will permit himself to be shot from the mouth of a huge cannon, as an added attraction.

Schooley's Winter Garden Revue, presenting a company of 35 people in a lavish five-part spectacle, introducing the latest song, dance and comedy hits from Broadway successes, is the outstanding attraction at the fair.

Horse and automobile races and spectacular fireworks are other features, and the reduced admission of 25 cents for adults and 15 cents for children is expected to attract record-breaking crowds to the 1933 fair.

THE PRICE OF BUSINESS SPEED

CHICAGO, Ill. — Many appear to think that failures occur only in banks, but the complete story of business shows that failures of American banks are followed by failures of business enterprises, and have not been a cause of those failures, Dr. Harold Stonier, National Educational Director of the American Bankers Association, declared in a recent address here before the American Institute of Banking.

"It is true that we have had more failures in our banks than in the banks of a number of other countries," he said. "It is also true that we have had more failures in drug stores, grocery stores, railroads, and in every other type of business enterprise. At the same time, it must be said that we still have left after all our failures, more drug stores, more grocery stores, more railroads, and more banks than any other country."

BANKERS PREPARE FARM FINANCE BOOK

Tells Bankers and Farmers What to Consider in Making Sound Loans

A book on "Making Farm Investments Safe" has been prepared by the Agricultural Commission of the American Bankers Association, summarizing material published by it during the past ten years. It presents a compendium of scientific facts, practice and experience in farming, with timely and helpful suggestions to serve as a reference and guide in the daily routine of banking and farming. From it practical workers in these fields can obtain an idea as to what extent and in what manner farm loans should be limited by soil erosion, weeds, plant diseases, rodents and fire hazards, etc.

The book also indicates how much is added to the security of a farm loan by the farmer who keeps accounts and practices good business methods, as well as the extent to which loans are safeguarded by crop rotation, production of legumes, judicious use of commercial fertilizers, the use of quality seed and the providing of home grown feeds.

Another section sets forth the precautions that should be exercised by both the banker and farmer when negotiating loans to increase or improve dairy production, or beef, sheep, swine or poultry production, as well as what factors should be considered in the economic marketing of products and the way efficiency in production affects efficiency in marketing. Many other everyday details of farm life that have a practical financial significance are treated in the book. A particular important section deals with experiences with farm leases and another with directed farm credit.

Banks Make Best Record in R. F. C. Loans Repayments.

Among the loans of $2,819,000,000 made by the Federal Government through the Reconstruction Finance Corporation, the highest percentage of repayments, official reports show, has been made by banks, indicating the return of stability as the chief unsettling element of public fear has been lifted from them.

The Reconstruction Finance Corporation has authorized cash advances, fully secured by sound collateral, to 6,278 banks since it began operations in February, 1932, and made actual disbursements to them in the amount of $1,221,878,000. Of this amount, however, $545,072,000, or over 44 per cent, has been repaid by the banks. All other classes of borrowers combined have repaid about 16 per cent of their loans.

Hndgins Tells How To Save Lespedeza

According to the information from Mr. Byrne, Extension Agronomist and from the Agricultural Department of Washington, there will be a marked increase in the demand for Lespedeza Seed in the Spring; since this is true, I take this opportunity of urging the Appomattox growers to save every acre they possibly can this fall.

There are two methods of saving Lespedeza Seed, if you are going to thresh the whole crop with the threshing machine, it should be cut just as the field becomes thoroughly brown or golden color. Start your mow early in the morning, run until about eleven o'clock, next day while slightly damp, glean in wind-rows there let it remain until the threshing machine arrives where you can thresh it right out in the field. Saved in this method, the hay will be good roughage for live stock during the winter.

The other method is with a pan attached to the cutter bar of the mower. If you are going to use the pan, I would not advise saving the seed until after the middle of October; in fact any time the latter part of October through November is an ideal time to cut seed with the pan method. You can save from 50 to 60 and thresh the remainder if you care to do so. Pans can be purchased from Appomattox Hardware Co.

You can safely count on from two hundred to five hundred pounds of seed per acre, depending on the thickness of the stand. There are a number of our farmers who can make from twenty to fifty dollars a day by the home of seed. Some of these methods of saving Lespedeza seed.

In this crop, I will be glad to give any the information regarding Lespedeza if you will write or call on me.

R. B. Hudgins,
County Agent.

It is indeed a pleasure to direct our many readers to such an establishment, the proprietors, Hackworth Bros., who have always been of the more progressive type and who boost for every enterprise in their community.

Our Part in Government

TODAY men of all nations are evidencing a deep interest in the affairs of their respective governments. This progressive attitude has indeed resulted in the ceaseless, though not always recognized, out-pouring of the wonderful spirit of God and men are equal. This does not mean that every person as a citizen is trying to do his share in public duty, however, to everyone comes the privilege of voting, and of being a supporter of right government, and this is indeed an high duty. To each citizen come opportunities to support a righteous government in the midst of many misthinking. Through the cultivation and exercise of such qualities of thought as are implied by the words understanding, charity, citizenship, and prayer, the individual can prepare himself to be a useful citizen in his community.

Christian Science enables one to expand these subjects in their true light. As men begin to grasp the truth concerning God's government, and to prove their understanding by bettering individual thinking, they find themselves willing and ready to exercise the doorway to the highest service is opened through the power forged in the prayer which founds thought on the divinely substantial Rock, Christ, the true Idea of God, the strong foundation for the superstructure of harmonious living. True prayer avails, and the Christian Scientist learns to pray availingly not alone for the good of himself, but for the world. In the Christian Science, prayer is fervent, reverent aspiration; it is spiritual vision. Prayer is that mental attitude which rests on the conviction that God, Love, is the only cause and creator, and that every real effect is spiritual. Prayer breaks the illusion of besieging material sense, and through the mists it reveals God's man, governed by God. Through prayer consciousness is filled with the holy facts of being; greed is replaced with unselfed love, hatred with brotherhood, lust with peace, and ignorance with wisdom.

"Are we benefited by praying?" asks Mrs. Eddy on page 2 of Science and Health; and her immediate answer is, "Yes, the desire which goes forth hungering after righteousness is blessed of our Father, and it does not return unto us void." As men universally learn as to pray, the mental atmosphere of the whole world will be suffused with loving-kindness, and all can then echo the angelic rejoicing, recorded by the Revelator, "The kingdoms of this world are become the kingdoms of our Lord, and of his Christ; and he shall reign for ever and ever."—*The Christian Science Monitor.*

Many deore to service are opened by the qualities gained in the word "citizenship." Citizenship, as a way of living, has to do with such opportunities as come to the thinker in the usual routine of life, in the home, the school, or the shop. Citizenship means bringing to bear upon these activities the influence of a high ideal. Such ideals are equally found in Golden Rule, "All things whatsoever ye would that men should do to you, do ye even so to them." For the student of Christian Science to be a good citizen he must practice the truth discovered and founded by Mary Baker Eddy. That this religion is the Science of Jesus' teachings has been proved many times, and that which its students have done and are now exercising of such qualities of thought as are implied by the words understanding, charity, citizenship, and prayer, the individual can prepare himself to be a useful citizen in his community.

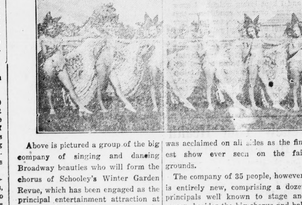
BEAUTIFUL NEW REVUE AT STATE FAIR



Above is pictured a group of the big company of singing and dancing Broadway beauties who will form the chorus of Schooley's Winter Garden Revue, which has been engaged as the principal entertainment attraction at the annual Virginia State Fair, to be held in Richmond the week of October 2 to 7.

The 1933 edition of the revue is to be along similar lines to the performance given at last year's fair, which was acclaimed on all sides as the finest show ever seen on the fair grounds.

The company of 35 people, however, is entirely new, comprising a dozen principals well known to stage and screen, besides the big chorus and ballet of pretty girls.

The performance is in five major parts, and includes "An Indian Fantasy," "Jungleland," and "Parade of the States," among its spectacular features. Elaborate costumes, stage settings and unusual electric effects contribute to the beauty of the production.

Several specialties by individual stars, and a half-dozen circus and vaudeville headline acts will be interspersed through the action of the revue, in addition to the performance of Zacchini, "the human bullet."

Admission to the fair grounds will be reduced to 25 cents for adults this year, and 15 cents for children.
